

SAPC-21203
Copy 6 of 7

13 November 1957

MEMORANDUM FOR: [REDACTED]

SUBJECT : Pictures of Operational Equipment for
Briefing [REDACTED]

1. In connection with [REDACTED] 3738 (IN 29501, 6 Nov 57) in which [REDACTED] requests pictures of the U-2 and photo and ELINT equipment, Mr. Bissell requested that I send out a cable agreeing to provide such (see [REDACTED] 4504, OUT 70971, 13 Nov 57) and to discuss with you the preparation of same.

2. In your absence today and because of the possible need to manufacture graphic presentation, I visited Operations to discuss the matter with [REDACTED]. They were good enough to show me existing displays which I examined. These seem to me to fill the bill except that they would need to be cleaned up a bit. The displays referred to are:

- a. The board showing the aircraft
- b. The displays showing pictures of A-1, A-2, B, C, and the tracker
- c. Displays with actual photographs showing the configuration of each of the foregoing showing a relationship to coverage on a map.

3. There were no photographs of electronic materials, but there are boards describing capabilities. I recommend that pictures of the electronic capabilities on separate sheets with the descriptive material now displayed being inserted below the picture be prepared.

2

SAPC-21203

4. I pointed out that the need for these would likely be toward the end of November or the first week in December.

5. Would you be good enough to see whether these ideas meet your own and if so confirm to [redacted] these suggestions so that they may go ahead.
